

READY FOR A REVOLUTION?

OneTab Cleaning Tabs is a revolution within the industry of cleaning agents!

The idea is simple, replace the unnecessary process of shipping liquids all over the world by using tabs instead. The customer simply adds water!

OneTab Cleaning Tabs is a range of different products, all specifically produced to be highly effective within an area of household cleaning. It doesn't matter if you need to clean the kitchen, bathroom, cabin or your office – there is a tab for everything!

Join us on the journey of changing the way we use cleaning agents, give OneTab a try today!

HOW DOES IT WORK?

1

Drop the tab in to
your OneTab-bottle!

2

Add warm water
(750ml) and wait
10 minutes!

3

Give the bottle a
light shake and your
good to go!

OneTab™ = SMART!

One of the most obvious advantages of OneTab Cleaning Tabs is that you only need to handle a small package with two tablets instead of two whole bottles of liquid.

According to our statistics the most common order of cleaning agents for a vessel is 12 pieces, most of the time that is the same amount that is contained in one box (for most other brands). If you purchase 6 packs of OneTab (12 tablets) it is the same thing but with one big difference, you reduce the volume of the product by about 90%!

That is important for several reasons, the most obvious being:

- 1.** Transporting OneTab requires less space! One pallet of OneTab would equal about twelve pallets of ordinary cleaning agents! Since this is applicable for the whole supply chain it leads to massive reductions of CO2-emissions compared to traditional transport!
- 2.** Space on board is not unlimited! You will save yourself loads of space by storing OneTab compared to storing ordinary cleaning agents.
- 3.** No plastic waste! Since you re-use your OneTab-bottles there is no plastic waste! Amazing!

Recycled plastic!

The OneTab-bottle is, of course, completely made out of recycled plastic waste (PET)!

Made for OneTab!

The volume (750ml) is the exact dosage of one tab!

High Quality!

The OneTab-bottle won't disappoint, overall durable with an excellent spray pattern!

Again, again and again...

Fill, use, refill, use and just keep going! As long as you using the same bottle you won't generate more plastic waste from cleaning agents!
